Please note: all students must wear solid enclosed footwear for the duration of the course.

Please ask about State Government funded programs, which may be available dependant on eligibility and funding availability.

Blueprint is a Registered Training Organisation under the Australian Quality Training Framework.

Forklift Refresher Training

Blueprint Employment & Training Inc (Blueprint Inc) offers this new opportunity for forklift operators to ensure their skills and knowledge are kept up to date (*as per new changes to the Workplace Health & Safety Regulations 2008*) in our training centre in Slacks Creek or on site.

This **Blueprint Forklift Refresher Program** is targeted towards licensed forklift operators and may include:

1. Employees who are currently operating a forklift however have not received formal training for an extended period of time; or
2. Employees who have limited current experience and are looking to update their knowledge and skills.

The program is scheduled as an intensive 2½ hour training session covering up to date topics such as:

- Legislative changes
 - Responsibilities
 - Employer/Employee roles
 - Fines and prosecutions
- Pre-Operational Checks
- Safe operating practices
- Stability and safe driving for workplace conditions
- Safe shut down practices

Recent changes to the Forklift Licensing system have put more emphasis on ongoing training for both the employer and the operator. This course will help the business meet these new requirements and ensure all operators have up to date knowledge in safe forklift operations.

The total cost of the program is \$250.00 per program (Plus GST)

The training is delivered by professional, accredited forklift trainers who have real and current practical experience to draw from, with practical examples of current workplace procedures and practices integrated throughout the training.

Training can be delivered on the employer's site by negotiation. Flexible start times can also be arranged to allow for shift work. Training content can also be adapted to suit employer's particular needs, for example shift workers; HACCP; safe use of attachments; cold storage etc.

Extended programs can also be arranged which include "assessments" of employee forklift knowledge or operating competency. Please request a company specific quote for this program.

Upon completion the company will receive a written report and employees are issued a Statement of Attendance.
